

We do not have Instant Traffic & Weather here in the metro Charlotte area yet, but I look forward to the day we do. It is such a valuable commodity and will be very useful for commuting, going to see family in other counties of the state and making daily trips. Why do you feel threatened by a convenience we are willing to pay for? Leave XM alone and go concentrate on getting rid of gay marriage and other things that are tearing at the moral fabric of our country, okay? Thanks for listening.
